

IMMERSE™ TABLE

As space design requires more flexibility, organizations recognize the growing need for adaptable spaces that support the diverse and dynamic ways people work. The Immerse table creates a landscape of varied surfaces to support working in a communal way and the temporality of meetings. It provides a community hub that transforms the evolution of collaborative experiences, allowing interactions to organically change by the moment.

Designed By Studio Urquiola

Studio Urquiola was founded in 2001 by architect and designer Patricia Urquiola. Located in Milan, the studio works in the sectors of product design, interiors, architecture, installations, art, graphic design, artistic direction and concept creation. In architecture, Studio Urquiola specializes in residential, hospitality, retail, and exhibition markets.

IMMERSE™ TABLE

- + Immerse enables today's workstyles by offering a micro atmosphere with options for where to work in one space, stimulating group interaction and supporting individual work.
- + The variety of shapes, sizes, and levels makes a space more inviting, supporting different activities, and nurturing a sense of community.
- + The Immerse table is available in four configurations:
 - Single – one worktop in round, square, racetrack, or ledge.
 - Stack – rectangular worktop with a lower sill for storing personal items and work tools.
 - Shift – overlapping worktops at different heights in seated, counter, or bar height.
 - Overlap – overlapping worktops at seated and counter height.
- + Immerse offers variation in table heights to create opportunities for combined sit/stand postures so everyone is at a visible level.
- + The shift option allows for people to split teams into two groups at adjacent worktops with varied heights.
- + Its scale provides ample space around it—similar to a kitchen island—encouraging people to gather.
- + Immerse adds a fun and unique personality to community spaces—from conference rooms to project spaces, studios, and dining areas.
- + An array of colors and materials create comfortable workspaces that attract people seeking the coziness of residential spaces.
- + Dress it up or down, and add accessories that support a variety of activities.
- + Optional planters, either round or oblong, offer ease of power access with a modern aesthetic, as well as storage for meeting essentials.
- + Cables remain hidden to enhance communal activities such as collaboration.
- + Immerse is a playful table solution with a residential aesthetic that warms up the work environment.
- + Immerse helps create destinations that foster well-being through physical, cognitive, and emotional ergonomics, creating a sense of wholeness for people at work.
